

Skier triggered avalanche NE aspect Bridger.

Bridger Bowl

Bridger Range

11/27/2022

Code

HS-ASu-R2-D1.5-I

Elevation

7800

Aspect

NE

Latitude

45.82640

Longitude

-110.92900

Notes

From obs: "Triggered a small(d1r1?) [wind slab](#) off the bridger chair in bounds at bridger. Little skiers right of bumble chute on the roll over skiers left of bronco. NE face. Rollover around 35 degrees mellowing throughout the run. The face had tracks from earlier today before i triggered the [slide](#). I was able to self arrest and stop myself before being carried. The crown was around 20-25 ft wide and the [slide](#) ran roughly 100ft downhill before stopping. Both myself and my partner skied away unharmed."

Number of slides

1

Number caught

1

Number buried

0

Avalanche Type

Hard slab avalanche

Trigger

Skier

Trigger Modifier

u-An unintentional release

R size

2

D size

1.5

Bed Surface

I - Interface between new and old snow

Problem Type

Wind-Drifted Snow

Slab Thickness

8.0 inches

Vertical Fall

100ft

Slab Width

25.00ft
