

Serious signs of instability up black canyon

Date

Tue, 01/23/2024 - 14:35

Activity

Snowmobiling

Collapsing snow could be felt underneath my sled all day up Black Canyon Loop trail, east of Island Park. There was a moment where shooting cracks spread from my ski tips to about 10 yards away on flat ground. The canyon just north my location was probably steep enough to slide.

Region

Island Park
