

New snow and collapses

Date

Sun, 12/29/2024 - 16:20

Activity

Skiing

About 2 feet of new snow since Friday, 10 inches of that were today.

Couple collapses... Most aspects. No avalanches observed but visibility has been very low

We dug snowpits on Saturday. SW facing, 9700 ft. Average HS 120. Several ECTNs 30 down. No [propagation](#).
Snow above the 12/21 [sun crust](#) is F hard

Also dug a pit today.... NW facing, 9200 ft. HS 125. ECTN12 35 down x2. There is also a thin crust 45 cm down in this pit. 4f snow above.
